- JAVASCRIPT
- REACT.JS
- BOOTSTRAP
- JQUERY
- REDUX

EXPERIENCE

INTERNSHIP

Exposys Data Labs

Designed and developed the user interface like "burger" website, enabling user customization of burgers with a wide range of ingredients. Employed HTML, CSS, and JavaScript to craft an intuitive and responsive burger customization interface. Ensured compatibility across multiple browsers and optimized the site for mobile devices, guaranteeing a smooth user experience

PROJECTS

Swigato

A dynamic food delivery app, boasting extensive restaurant listings, robust search features, and an intuitive menu system. Standout features include a user-friendly menu interaction, seamless cart management, and real-time updates through the integrated Swiggy API. It's a flavorful blend of innovation and convenience for a delightful dining experience.

Netflix Clone

Created responsive user interfaces with HTML5, CSS3, and JavaScript, emulating the design of Netflix. Successfully integrated APIs to retrieve and present movie and TV show information, showcasing proficiency in API integration.
